Population Growth and Current Deviations

The Statewide Database has released the final California Census population, reallocating the state prison population, providing the final dataset that Cities and Counties must use to comply with the Fair Maps Act. This final population identifies the whole count of persons and where they resided as of April 1, 2020. Redistricting Partners has concluded the work of placing this data into the census blocks, block groups, and tracts.¹

Based on this data, the county has grown by 92,006 residents, or 13.4%, since the last decennial census. This is significantly higher than the state population change of 6.1%.

¹ These counts are based on the 2020 Census geography. There may be slight differences as many censusblocks were consolidated.

District 5 saw the largest increase of residents with 40,107, and the district with the slowest growth was District 4, which gained 7,226 residents. All five county districts experienced a growth in population.
