Population Growth and Current Deviations

The US Census has released the decennial census in a "legacy format", identifying the whole count of persons and where they resided as of April 1, 2020. Redistricting Partners has concluded the work of placing this data into the census blocks, block groups, and tracts.

This data represents the whole population data prior to a state required reallocation of state prison population that will be conducted by the Statewide Database at UC Berkeley. This adjusted data will be completed in the coming weeks and updated counts will be provided at that time.

Based on this data, the county has grown by 93,921 residents, or 13.7%, since the last decennial census. This is significantly higher than the state population change of 6.1%.

District 5 saw the largest increase of residents with 41,613, and the district with the slowest growth was District 4, which gained 6,821 residents. All five county districts experienced a growth in population.

2020 Population and Growth
(2010 Census to 2020 Census)

	Estimated	2010	Change
